AMERICAN ACADEMY OF
ORTHOPAEDIC SURGEONS

Cheyenne Orthopaedics Imaging Earns MRI Reaccreditation by IAC

AMERICAN ASSOCIATION OF
PHYSICISTS IN MEDICINE

Magnetic Resonance Imaging (MRI) is an extremely useful diagnostic imaging tool, performed on an estimated 10 million patients annually in the United States, enabling interpreting physicians to visualize the structure and function of the body. As it provides detailed images of the soft tissue of the body, MRI is especially helpful in diagnosing related neurological, musculoskeletal, cardiovascular and oncological conditions.

AMERICAN SOCIETY OF
NEUROIMAGING

There are many factors that contribute to an accurate diagnosis based on MRI. The training and experience of the technologist performing the procedure, the type of equipment used and the quality assessment metrics each facility is required to measure, all contribute to a positive patient outcome. IAC accreditation is a "seal of approval" that patients can rely on as an indicator of consistent quality care and a dedication to continuous improvement.

AMERICAN SOCIETY OF
RADIOLOGIC TECHNOLOGISTS

Cheyenne Orthopaedics Imaging located in Cheyenne, WY has been granted a three-year term of accreditation by the Intersocietal Accreditation Commission (IAC) in MRI in the area(s) of Musculoskeletal MRI. This latest accreditation awarded to Cheyenne Orthopaedics Imaging demonstrates the facility's ongoing commitment to providing quality patient care in MRI.

INTERNATIONAL SOCIETY FOR
MUSCULOSKELETAL IMAGING
IN RHEUMATOLOGY

Accreditation by the IAC indicates that Cheyenne Orthopaedics Imaging has undergone an intensive application and review process and is found to be in compliance with the published *Standards*, thus demonstrating a commitment to quality patient care in MRI. Comprised of a detailed self-evaluation followed by a thorough review by a panel of medical experts, the IAC accreditation process enables both the critical operational and technical components of the applicant facility to be assessed, including representative case studies and their corresponding final reports.

SOCIETY FOR CARDIOVASCULAR
MAGNETIC RESONANCE

About IAC

IAC provides accreditation programs for vascular testing, echocardiography, nuclear/PET, MRI, diagnostic CT, dental CT, carotid stenting, vein treatment and management and cardiac electrophysiology. The IAC programs for accreditation are dedicated to ensuring quality patient care and promoting health care and all support one common mission: *Improving health care through accreditation*[®]. IAC accreditation is widely respected in the medical community, as illustrated by the support of the national medical societies related to MRI, which include physicians, technologists and physicists. To date, the IAC accrediting divisions have granted accreditation to more than 14,000 sites throughout the United States, Canada and Puerto Rico.
